Tribute to wildlife

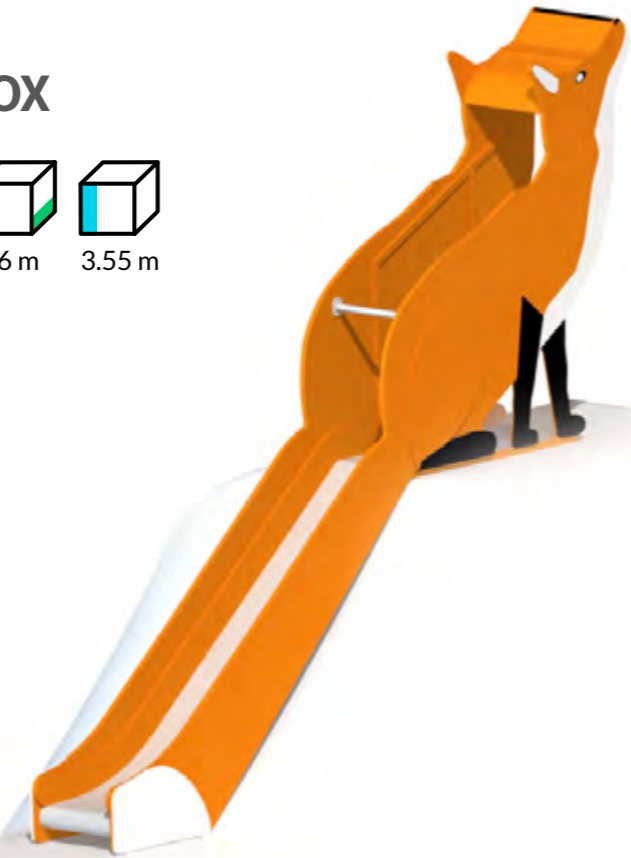

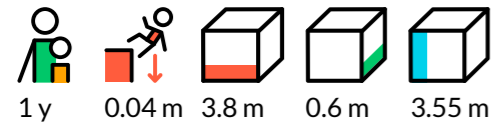

You are never alone in the forest even when there is no one in sight. Seems scary? Not at all! The wildlife around us is wonderful - birds and animals live in harmony with nature. When you walk in the forest open minded, ready to see and hear, then you can experience the world exactly as it really is. Everything is real and absolutely inspiring!

This catalogue with our latest product lines is our Tribute to Wildlife. The birds and animals we hear and see when we take time to look and notice. In Estonia sometimes you don't even need to go to the forest to meet deer, foxes, rabbits, or squirrels. Your paths may cross in your home street or in your garden. A beautiful pair of swans allows themselves to be admired on the pond in the middle of the park and smaller birds give concerts from early morning till late night. Just take your time and listen.

Slides and playhouses, spring swings and see-saws, activity tracks and climbing frames are all inspired by nature and its vivid characters. As a tribute to wildlife, our new product lines BIRDS and ANIMALS bring those wonderful creatures into parks, playgrounds, school yards and home gardens. So that children can learn to know them better and feel free and safe living in harmony with nature.

LM501

Slope slide FOX

Description

Slope slide FOX is a 1.5 metre high slide with a platform, suitable for slopes. Shaped like a fox looking into the sky.

Material

Product frame, support beams and metal details are made of hot-dipped galvanized steel, all fixing accessories from stainless steel. All side panels are made of 15 mm HDPE. The slide has got a stainless-steel sliding surface, which can be replaced by HDPE in case requested. Product's ground fixings are made of hot-dip galvanized metal and as standard solution it is concreted into the ground.

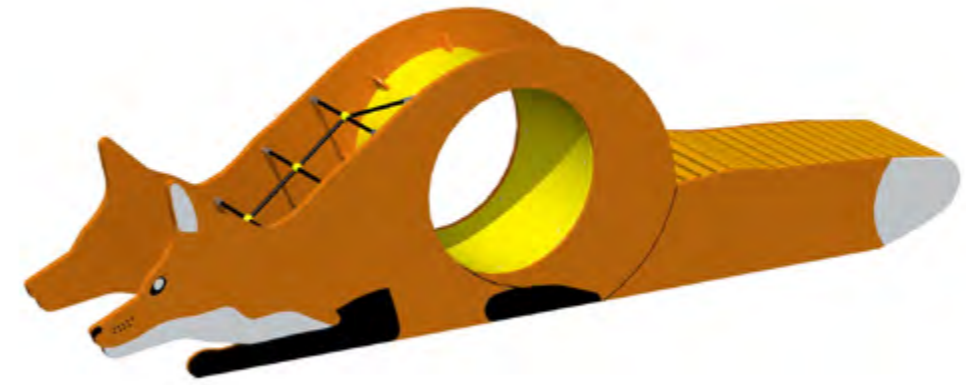

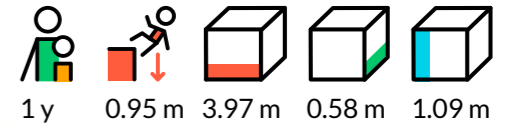

Did you know ...
that foxes are solitary creatures that tend to fight less than other canids.

RS202

Climbing frame FOXHOLE 2

Description

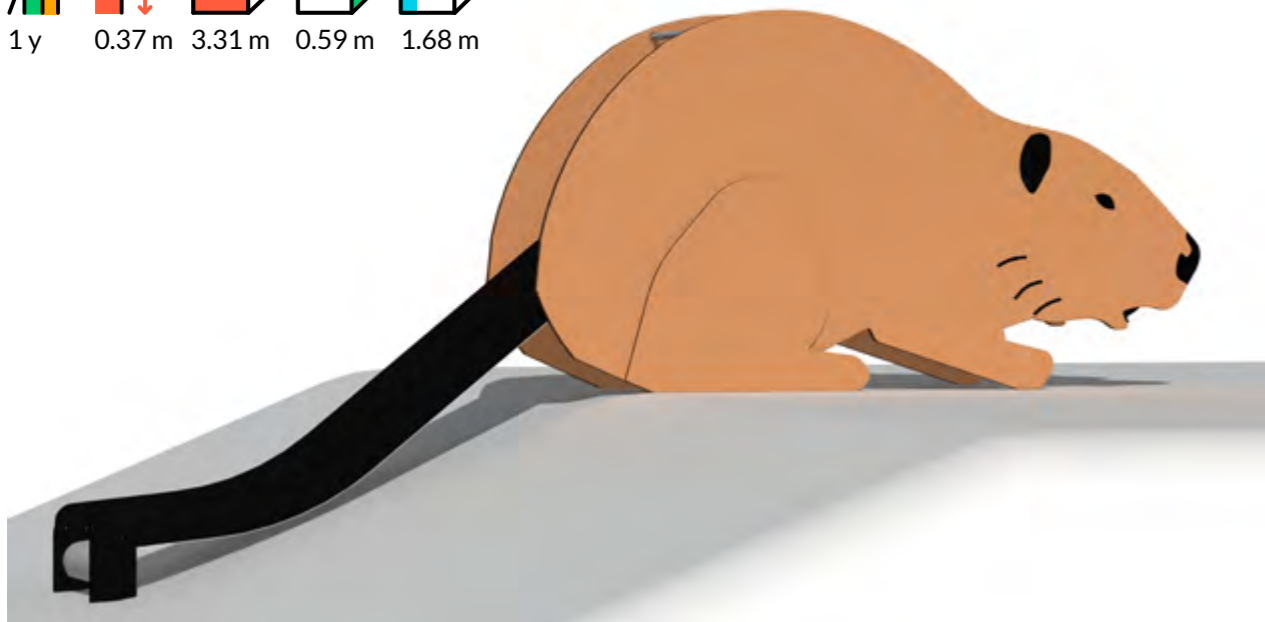

Climbing frame FOXHOLE 2 is designed to help develop gross motor skills and promote active play. The tube is suitable for both smaller and bigger crawlers. Kids can safely crawl through the tunnel or use it to hide from rain, sun, or to play hide and seek. Climbing ropes on both sides of the tunnel allow kids to climb also onto the tunnel. The tail can be used for sitting and relaxing or balancing.

Material

The side panels and tunnel are made of HDPE. The balancing platform/seat is made of painted timber boards. Fixing accessories are made of stainless steel. Product's ground fixings are made of hot-dip galvanized metal and as standard solution it is concreted into the ground.

LM502
